- furthering and encouragement of knowledge and research concerning donation and/or transplantation;
- creating a scientific forum for activities in the field of donation and/or transplantation.

It aims to achieve this purpose, among other things, through:

- being a forum for discussions about both positive and negative clinical and scientific experiences, introduction of confirmed experimental findings and new methods within the clinical practice, legal and ethical problems and questions related to donation and/or transplantation and experimental research;
- planning and organizing of multi-centre studies;
- collaboration with organ distributing and other organizations or authorities dealing with organ donation and/or transplantation;
- contributing to education and training;
- contributing to quality guidelines concerning donation and/or transplantation;
- taking part in legal persons, whatever their legal form, which are aimed at obtaining financial means for the benefit of the Society.

The European Society for Organ Transplantation is a major scientific and not-for-profit society and dedicated to exchange knowledge about donation and transplantation, thus improving health and well-being of patients affected by end stage organ disease. Involving many dedicated voluntary professionals ESOT provides an extensive education program and generates best-practice guidelines in the field of transplantation.

ESOT is registered as a charity (Algemeen Nut Beogende Instelling: ANBI) in the Netherlands.
